Education

K J Somaiya College of Engineering, B.Tech in Electronics and Computer Engineering Oct 2022 – Jun 2026

- CGPA: 7.97/10
- **Key Coursework:** Object-Oriented Programming, Data Structures, Analysis of Algorithms, Database Management Systems

Experience

IT Intern, Hindalco Industries Limited – Talaja May 2025 – July 2025

- Built and optimized PL/SQL procedures for data retrieval and insertion
- Gained hands-on experience with Oracle SQL, Workflow Builder, Form Builder, and Report Builder
- Contributed to the Toller Blockchain Auto Scrap Receiving process
- Involved in generating a new Lot Ticket Series for FCL plant tracking

Full Stack Web Developer Intern, KJSCE – Mumbai Jul 2024 – Dec 2024

- Developed a college-wide Allotment Software using React.js for registering open electives and minor-honors courses
- Engineered 6 responsive pages with 20+ reusable React components, enhancing user experience that streamlined processes for the entire college community

Projects & Hackathons

AI Healthcare Platform – Codenovate 2024, Hyderabad & Navonmesh 2.0, Raipur [Link](#)

- Designed and implemented a full-stack AI healthcare web application in just 24 hours during national hackathons, showcasing rapid development capabilities
- Designed responsive UI using **React.js**, integrated backend APIs via **Flask**, and implemented MongoDB-based data handling
- Won the Best in Category award for innovation at Codenovate 2024
- Ranked among the Top 30 Teams out of 500+ participating teams at Navonmesh 2.0

Smart Farm Automation System – Parul-Hackverse 2025, Vadodara

- Built an IoT-based solution for efficient farm water management with real-time sensor monitoring
- Visualized sensor data using a web dashboard and added PDF export functionality for analytics
- Reached the Finalist stage among top-tier teams from across India

WhatsApp Stats Checker [Link](#)

- Created a web application to analyze WhatsApp group .txt exports, providing users with instantaneous message count statistics per participant
- Used Python for parsing and simple Flask backend; frontend made using HTML, CSS, JavaScript

Phone Number Memory Game [Link](#)

- Developed an interactive memory game, inspired by Google's "Learn Pi" concept, to enhance user recall of multi-digit phone numbers
- Implemented using plain HTML, CSS, and JavaScript with custom logic for user input matching

Skills

- **Languages:** Java, PL/SQL, HTML, CSS, Javascript, Python
- **Databases:** MySQL, MongoDB, PostgreSQL, Oracle
- **Frameworks & Technologies:** React.js
- **Developer Tools:** Git, Github, VS Code, Pycharm

Certifications

- **NVIDIA** – AI Infrastructure and Operations Fundamentals
- **Amazon Web Services** – Introduction to Information Technology and AWS Cloud
- **Google** – Digital Marketing Fundamentals

Extracurricular Activities

Digital Marketing and Content Writing Intern, KJSCE Jun 2023 – Jul 2024

- Coordinated and wrote content for K J Somaiya College of Engineering's official Instagram, Facebook, and LinkedIn handles
- Created and published over 120+ social media posts, maintaining consistency, tone, and engagement across platforms

Football Player, KJSCE & MFA Leagues 2015 – Present

- Represented K J Somaiya College of Engineering in multiple inter-collegiate tournaments across Maharashtra
- Played in official Mumbai Football Association (MFA) Leagues for various clubs at a competitive level
